  - Accepted and managed donations from customers
  - Judging the viability of items selling and culling stagnant inventory
  - Suggested and implemented changes to improve the selection and quality of books in the shop front

## PROJECTS & COURSEWORK

---

- **3D Printing Post Slice DLP Supporter** github.com/spe-uob/3DPrinting  
*Analyse sliced 3D models for unsupported areas and insert supports for them*
  - Multi-threaded Java based application using OpenCV Libraries to process large files at high speeds
  - Developed within an agile team of 5 people, using git branching and merging to manage feature development
- **Data Analysis** github.com/JonathanMarriott/DataDrivenCS  
*Data Driven Computer Science Labs and Coursework*
  - Using Scikit-Learn and Pytorch libraries to implement maximum likelihood estimates, linear and non-linear least squares regression in a practical setting

## ACHIEVEMENTS & INTERESTS

---

**Duke of Edinburgh Gold & Silver & Bronze Award** Completed

**ITC Level 3 Outdoor First Aid** Qualified

**Road Cycling** Keen recreational cyclist who enjoys competing in time trial events

**Electric Guitar** Avid player for over 4 years
